Download

jigs, automated measuring, automated realignment of beam and carriage, pick-and-place of jigs, taper cutting, and NN cutting. 2009 | woodWOP 6.2. New, icon-based, language-neutral user interface; improved schedule and data management; ability to project future workflows to see how long workpieces will take and the accuracy of cutting patterns. 2009 | woodWOP 6.3. New, icon-based, language-neutral user interface; input/output manager allows for different carriage-side input devices (including an ultrasonic sensor), software for specific cutting tasks, and a pull-down menu for accessing each one. 2009 | woodWOP 6.4. New, icon-based, language-neutral user interface; ability to monitor continuous processes and react to machine state changes. 2010 | woodWOP 6.5. New, icon-based, language-neutral user interface; printer for custom production cuts. 2010 | woodWOP 6.6. New, icon-based, language-neutral user interface; ability to cut non-orthogonal or angled cuts. 2012 | woodWOP 6.7. New, icon-based, language-neutral user interface; ability to cut curved or flexed workpieces. 2014 | woodWOP 6.8. New, icon-based, language-neutral user interface; can be controlled via web browser. 2015 | woodWOP 6.9. New, icon-based, language-neutral user interface; faster due to faster architecture; ability to maintain a multi-axis cutoff; autocut. 2017 | woodWOP 6.10. New, icon-based, language-neutral user interface; new forms and improved input methods for inputting parts; and a new workflow generator for cutting curved, elliptical, or other specific shapes. 2017 | woodWOP 6.11. New, icon-based, language-neutral user interface; new forms and improved input methods for inputting parts; and a new workflow generator for cutting curved, elliptical, or other specific shapes.
